

**REPLACED BY
ART 34 AMDT****Claims**

1. An isolated polypeptide comprising an amino acid sequence which has at least 70% identity to the amino acid sequence of SEQ ID NO:2 over the entire length of of SEQ ID NO:2.
5
2. An isolated polypeptide as claimed in claim 1 in which the amino acid sequence has at least 95% identity.
- 10 3. The polypeptide as claimed in claim 1 comprising the amino acid sequence of SEQ ID NO:2.
4. The isolated polypeptide of SEQ ID NO:2.
- 15 5. A polypeptide comprising an immunogenic fragment of a polypeptide as claimed in any one of claims 1 to 4 in which the immunogenic activity of the immunogenic fragment is substantially the same as the polypeptide of SEQ ID NO:2
- 20 6. An isolated polynucleotide comprising a nucleotide sequence encoding a polypeptide that has at least 70% identity to the amino acid sequence of SEQ ID NO:2, over the entire length of SEQ ID NO:2; or a nucleotide sequence complementary to said isolated polynucleotide.
- 25 7. An isolated polynucleotide comprising a nucleotide sequence that has at least 70% identity to a nucleotide sequence encoding a polypeptide of SEQ ID NO:2, over the entire coding region; or a nucleotide sequence complementary to said isolated polynucleotide.
- 30 8. An isolated polynucleotide which comprises a nucleotide sequence which has at least 70% identity to that of SEQ ID NO:1 over the entire length of SEQ ID NO:1; or a nucleotide sequence complementary to said isolated polynucleotide.
9. The isolated polynucleotide as defined in any one of claims 6 to 8 in which the identity is at least 95%.

10. An isolated polynucleotide selected from:

(a) a polynucleotide comprising a nucleotide sequence encoding the polypeptide of SEQ ID NO:2;

(b) the polynucleotide of SEQ ID NO:1; and

5 (c) a polynucleotide obtainable by screening an appropriate library under stringent hybridization conditions with a labeled probe having the sequence of SEQ ID NO:1 or a fragment thereof;

or a nucleotide sequence complementary to said isolated polynucleotide

10 11. An expression vector or a recombinant live microorganism comprising an isolated polynucleotide according to any one of claims 6 - 10.

12. A host cell comprising the expression vector of claim 11 or a membrane thereof expressing the polypeptide of claim 1.

15

13. A process for producing a polypeptide of claim 1 comprising culturing a host cell of claim 12 under conditions sufficient for the production of said polypeptide and recovering the polypeptide from the culture medium.

20 14. A vaccine comprising an effective amount of the polypeptide of any one of claims 1 to 5 and a pharmaceutically acceptable carrier.

15. A vaccine comprising an effective amount of the polynucleotide of any one of claims 6 to 10 and a pharmaceutically effective carrier.

25

16. A vaccine comprising an effective amount of antigen presenting cells, modified by in vitro loading with a polypeptide of any one of claims 1 to 5, or genetically modified in vitro to express a polypeptide of claim 1 and a pharmaceutically effective carrier.

30 17. A vaccine as claimed in any one of claims 14 to 16 which additionally comprises a TH-1 inducing adjuvant.

18. A vaccine as claimed in claim 17 in which the TH-1 inducing adjuvant is selected from the group of adjuvants comprising: 3D-MPL, QS21, a mixture of QS21 and cholesterol, and a CpG oligonucleotide.
- 5 19. An antibody immunospecific for the polypeptide or immunological fragment as claimed in any one of claims 1 to 5.
20. A method for screening to identify compounds which stimulate or which inhibit the function of the polypeptide of any one of claims 1 to 5 which comprises a method selected
10 from the group consisting of:
- (a) measuring the binding of a candidate compound to the said polypeptide (or to the cells or membranes bearing the polypeptide) or a fusion protein thereof by means of a label directly or indirectly associated with the candidate compound;
 - (b) measuring the binding of a candidate compound to the said polypeptide (or to the
15 cells or membranes bearing the polypeptide) or a fusion protein thereof in the presense of a labeled competitor;
 - (c) testing whether the candidate compound results in a signal generated by activation or inhibition of the said polypeptide, using detection systems appropriate to the cells or cell membranes bearing the polypeptide;
 - 20 (d) mixing a candidate compound with a solution containing a polypeptide of any one of claims 1 to 5, to form a mixture, measuring activity of the polypeptide in the mixture, and comparing the activity of the mixture to a standard; or
 - (e) detecting the effect of a candidate compound on the production of mRNA encoding said polypeptide and said polypeptide in cells, using for instance, an ELISA assay.
- 25 21. A method for the treatment of a subject by immunoprophylaxis or therapy comprising *in vitro* induction of immune responses to a molecule of any one of claims 1 to 5, using *in vitro* incubation of the polypeptide of any one of claims 1 to 5 or the polynucleotide of any one of claims 6 to 10 with cells from the immune system of a
30 mammal, and reinfusing these activated immune cells to the mammal for the treatment of disease.

22. A method as claimed in claim 21 wherein the treatment is for ovarian or colon cancer.
23. An agonist or antagonist to the polypeptide of claims 1 to 5.
- 5 24. A compound which is:
- (a) an agonist or antagonist to the polypeptide of claims 1 to 5;
 - (b) isolated polynucleotide of claims 6 to 10; or
 - (c) a nucleic acid molecule that modulates the expression of the nucleotide sequence
- 10 encoding the polypeptide of any one of claims 1 to 5;
for use in therapy.
25. A process for diagnosing a disease or a susceptibility to a disease in a subject related to expression or activity of the polypeptide of any one of claims 1 to 5 in a subject
- 15 comprising:
- (a) determining the presence or absence of a mutation in the nucleotide sequence encoding said polypeptide in the genome of said subject; and/or
 - (b) analyzing for the presence or amount of said polypeptide expression in a sample derived from said subject.
- 20 26. An isolated polynucleotide selected from the group consisting of:
- (a) an isolated polynucleotide comprising a nucleotide sequence which has at least 70% identity to SEQ ID NO:3 over the entire length of SEQ ID NO:3;
 - (b) an isolated polynucleotide comprising the polynucleotide of SEQ ID NO:3;
 - 25 (c) the polynucleotide of SEQ ID NO:3; or
 - (d) an isolated polynucleotide comprising a nucleotide sequence encoding a polypeptide which has at least 70% identity to the amino acid sequence of SEQ ID NO:4, over the entire length of SEQ ID NO:4.
- 30 27. A polypeptide selected from the group consisting of:
- (a) a polypeptide which comprises an amino acid sequence which has at least 70% identity to that of SEQ ID NO:4 over the entire length of SEQ ID NO:4;

- (b) a polypeptide in which the amino acid sequence has at least 70% identity to the amino acid sequence of SEQ ID NO:4 over the entire length of SEQ ID NO:4;
- (c) a polypeptide which comprises the amino acid of SEQ ID NO:4;
- (d) a polypeptide which is the polypeptide of SEQ ID NO:4; or
- 5 (e) a polypeptide which is encoded by a polynucleotide comprising the sequence contained in SEQ ID NO:3.

28. A live vaccine composition comprising an expression vector or recombinant live micro-organism according to claim 11.
